

sdf\_astar.SDFAStar.combined  
Heuristics

cbf\_rrt.CBFRRT.isSafe

optimized\_astar.Optimized  
AStar.heuristics

```
graph LR; A[sdf_astar.SDFAStar.combined Heuristics] --> C[optimized_astar.Optimized AStar.heuristics]; B[cbf_rrt.CBFRRT.isSafe] --> C;
```

The diagram illustrates a data flow where two separate heuristic modules are combined into a single optimized heuristic module. The first module, 'sdf\_astar.SDFAStar.combined Heuristics', and the second module, 'cbf\_rrt.CBFRRT.isSafe', both point via arrows to the final module, 'optimized\_astar.Optimized AStar.heuristics'.
